

# COURSE BY ERIC VAN DOOREN, DDS

## Advanced Soft Tissue Management in the Esthetic Zone: Surgical and Prosthetic Concepts

This course will focus on surgical and prosthetic techniques in anterior single tooth implant restorations. Participants will be able to follow 2 live surgeries and simulate V3 implant placement combined with connective tissue grafting via hands-on model activities.

### PROGRAM

The course will be presented in English

- > **Theoretical course:** In-depth explanation of surgical and prosthetic protocol for anterior implant.
- > **Live surgery:** implant placement in healed or extraction site, using the guided surgical protocol / connective tissue grafting and provisionalisation.
- > **Live prosthetic treatment:** Optimizing soft tissue design on model and transferring to the clinical environment.
- > **Hands-on:** implant placement and soft tissue grafting on model, both in healed site and extraction site.
- > New developments in prosthetic materials and surgical procedures.

### DETAILS

The courses will take place on the following dates:

April 3<sup>rd</sup> | August 30<sup>th</sup> | September 26<sup>th</sup> | October 25<sup>th</sup> | November 22<sup>nd</sup>

Venue: Tavernierkaai 2, 8th floor, 2000 Antwerpen, Belgium

Price: 1,200€ excl. VAT

Registration fees include: 2 nights hotel accommodation, meals, airport transportation and 4 V3 implants.

### BIO

Dr. Eric Van Dooren is one of Europe's leading specialists; successfully combining periodontics, prosthodontics and dental implantology. He is also one of the co-developers of the new V3 implant. Dr. Van Dooren is in private practice in Antwerp, Belgium and Director of the onsite professional training center there. He is co-author of numerous books and an esteemed lecturer worldwide.

## AGENDA

9:00	Welcome
9:30 – 11:00	Theoretical portion: In-depth explanation of surgical and prosthetic protocol for anterior implant treatment.
11:00 – 11:30	Break
11:30 – 13:00	Live surgery – First patient: Implant placement in healed or extraction site using the guided surgical protocol combined with connective tissue grafting and/or provisional restoration (depending on patient)
13:00 – 14:00	Lunch
14:00 – 15:30	Live surgery - Second patient: Implant placement in healed or extraction site, using the guided surgical protocol combined with connective tissue grafting and/or provisional restoration (depending on patient)
15:30 – 16:00	Break
16:00 – 16:45	Hands-on: V3 Implant placement on models
16:45 – 17:30	Q&A
